Full job description

Your new company

Your new organisation is an industry leader, with business segments providing advanced Defence and Commercial technologies across Air, Land, Sea, Space and Cyber Domains. This company has an exciting opportunity for a Systems Engineer to join their team based in Adelaide.

Your new role

As a Systems Engineer your responsibilities will be to:

- Provide technical oversight and high-level engineering management of the ongoing contract sustainment activities in relation to the project and Support systems
- Provide technical oversight and high-level engineering management for the project contractor Ad-Hoc funded changes and other activities
- Acting as a Deputy Senior Design Engineer for all project systems
- Negotiate with internal and external stakeholders in a way that achieves project outcomes, whilst, maintaining key relationships
- Actively leading, training, and mentoring engineers and technical staff
- Contribute and work in a cross-functional team

What you'll need to succeed

- NV1 security clearance
- Electrical or Electronic Engineering qualifications
- Demonstrate expert understanding of engineering methods, design, and development
- Experience in systems engineering, Validation and Verification, Test and Integration, Risk Management
- Previous experience as a technical authority with design approval

responsibilities

- An expert understanding of engineering methods, design, and development
- Ability to sustain major systems
- Strong leadership and communication skills; ability to liaise with prime contractor, the customer, and other units

What you'll get in return

You will be offered a competitive salary and a permanent position in an organisation that is expanding, offering you a secure and challenging work environment.
